

## **Internship - Software Developer**

### **About Us**

At DynAgility we specialize in providing commercial-grade software exclusively for other software companies and e-businesses. Our areas of expertise include web applications, SaaS, machine learning, big data and analytics, and mobile solutions. We take pride in producing good, clean code while meeting our customers' deadlines and requirements. As an intern at DynAgility you will have a great opportunity to write real code while working on our current projects as you are mentored by our industry veteran engineers.

### **Responsibilities**

- Work as a team member within a distributed agile process
- Work on projects involving JavaScript, python, iOS, Android, and HTML5 apps
- Design, write, test, and deploy software solutions
- Learn to use tools such as JIRA, Confluence, GitHub, Hipchat, Docker, Jenkins, Ansible, Gherkin, Cucumber, AWS, Hadoop

### **Requirements and Preferences**

- Background in Computer science: current BS, MS
- Understanding of analytical & architectural concepts of programming
- Preferred experience with development and debugging in Python, Java, JavaScript, JQuery, HTML, SQL, Apache
- Experienced in developing native mobile apps is strongly preferred but not required
- Understanding of Agile Software Development is helpful

### **The Logistics**

- Flexible scheduling for part or full time internship
- Competitive Hourly Pay
- Awesome casual workplace
- Office located in the Northern VA, close to Dulles International Airport
